DXY index stabilizes higher

- During the *overnight* session, the price reached a minimum of \$17.96 and a maximum of \$18.00 units in the *spot* market. At the opening of the American session, the Mexican peso traded with a modest decline and was positioned in 9th place among the currencies of emerging countries that presented the greatest losses against the dollar. Today, the USD/MXN exchange rate remains below the psychological ceiling of \$18.00, as trading volume decreases and some investors take profits.
- The greenback, as measured by the DXY index, remains higher and hits an intraday high at 98.13 as traders await the FOMC minutes in the afternoon. The publication of the minutes will provide better clarity on the Fed's monetary policy expectations for 2026, considering the different economic projections and the eventual departure of Jerome Powell as chairman of the central bank.
- The G10 currencies show mostly negative movements, affected by the strengthening of the US dollar, where the pound sterling leads the retreat of the session, as expectations of cuts to the benchmark interest rate by the BoE continue. The yen trimmed gains from the previous session after Prime Minister Sanae Takaichi's budget hike was approved in the face of higher fiscal spending. Finally, the euro reflects the advance of the US dollar, even though the ECB's monetary policy expectations contrast with those of the Fed and favor the European currency in the medium term.

USD/MXN

Disclaimer

We, the Stock Market Analysis and Strategy Area, certify that the opinions contained in this document reflect exclusively the point of view of the analyst responsible for its preparation. We also certify that we have not received, and will not receive, any direct or indirect compensation in exchange for expressing a specific opinion of this report.

It is important to mention that analysts do not maintain direct investments or through intermediaries in the securities or derivative instruments subject to the analysis report, as well as that none of the members of the Board, general managers and executives of the level immediately below it, serve with any position in the issuers that can be analyzed in this document.

In the last twelve months, it is possible that Monex Grupo Financiero, S.A. de C.V. and/or the Financial Institutions that comprise it (hereinafter "Monex"), through its business areas, have received compensation for providing a common representation service, corporate financing, investment banking, corporate advice or granting of bank loans. to broadcasters that can be analyzed in this report. At the end of the last quarter, Monex does not hold investments, directly or indirectly, in securities or derivative financial instruments, whose underlying are securities, subject matter of this report, that represent one percent or more of its investment portfolio, of the outstanding securities or of the underlying of the securities issued.

This report is addressed to Monex's Directorate for the Promotion of Private Banking, Wealth Advisory and Business Banking. The recommendations reflect an expectation of a security's performance against its reference market and within a certain period. This behavior can be explained by the company's core value, but also by other factors. The calculation of the realized fundamental value is based on a combination of one or more methodologies generally accepted in financial analysis, and which may include, among others, analysis of multiples, discounted cash flows, analysis by parts or any other that applies to the particular case being analyzed. Notwithstanding the above, other factors could have more weight, including the flow of news, timing of profits, mergers and acquisitions, the market's appetite for a certain sector, among others; These factors may lead to a recommendation opposite to that indicated only by the fundamental value and its direct comparison with the price.

Our referral policy covers the following scenarios: Purchase. - When the expected return of the stock exceeds the expected performance of the IPyC by more than 5%; Hold.- When the expected return of the stock is between $\pm 5\%$ of the expected return of the IPyC; Sale.- When the expected return of the share is more than 5% lower than the expected return of the IPyC.
